

LETTER OF AGREEMENT

between

Polish-VACC
Warszawa FIR

and

VACC-Slovakia
Bratislava FIR

Effective: February 19, 2026 (AIRAC 2602)

1. General

1.1. Purpose

The purpose of this Letter of Agreement is to define the coordination procedures to be applied between Polish VACC and VACC Slovakia when providing ATS to air traffic (IFR/VFR) on the VATSIM network.

All information and procedures described in this Letter of Agreement shall not be used for real world purposes.

1.2. Operational status

All operationally significant information and procedures contained in this Letter of Agreement shall be distributed to all concerned controllers by appropriate means. This Letter of Agreement itself constitutes public information.

1.3. Validity

This Letter of Agreement becomes effective on February 19, 2026.

2. Areas of Responsibility and Sectorization

2.1. Areas of Responsibility

The lateral and vertical limits of the respective areas of responsibility are as follows:

FIR Warszawa

Lateral limits: as described in [AIP Poland ENR 2.1](#)

Vertical limits: GND – FL660

FIR Bratislava

Lateral limits: as described in [AIP Slovakia ENR 6.1](#)

Vertical limits: GND – FL660

2.2. Sectorization

2.2.1. FIR Warszawa

For detailed coordinates and sector ownerships refer to GNG, AIP Poland. Detailed ATS units AoR available [here](#).

Sector TMA Kraków West

Lateral limits: see appendix A1a

Vertical limits: GND – FL285

Responsible ATS unit: EPKK_APP (Kraków Approach), 121.075

Sector TMA Kraków East

Lateral limits: see appendix A1a

Vertical limits: GND – FL285

Responsible ATS unit: EPKK_E_APP (Kraków Approach), 126.975

Sector EPWW J LOW

Lateral limits: see appendix A1b

Vertical limits: FL95 – FL335

Sector EPWW J MID

Lateral limits: see appendix A1b

Vertical limits: FL335 – FL365

Sector EPWW J HIGH

Lateral limits: see appendix A1b

Vertical limits: FL365 – FL660

Sector EPWW R LOW

Lateral limits: see appendix A1b

Vertical limits: FL95 – FL335

Sector EPWW R MID

Lateral limits: see appendix A1b

Vertical limits: FL335 – FL365

Sector EPWW R HIGH

Lateral limits: see appendix A1b

Vertical limits: FL365 – FL660

2.2.2. FIR Bratislava

Sector Tatry

Lateral limits: see Appendix A2

Vertical limits: GND – FL135

Responsible ATS unit (in order of precedence):

1. LZTT_TWR (Tatry Tower), 121.350
2. LZBB_CTR (Bratislava Radar), 134.475

Sector BB

Lateral limits: see Appendix A2

Vertical limits: 8000ft – FL305 - except Sector Tatry (8000ft - FL135)

Responsible ATS unit (in order of precedence):

1. LZBB_CTR (Bratislava Radar), 134.475

Sector U

Lateral limits: see Appendix A2

Vertical limits: FL305 – FL660

Responsible ATS unit (in order of precedence):

1. LZBB_U_CTR (Bratislava Radar), 127.425
2. LZBB_CTR (Bratislava Radar), 134.475

3. Procedures for coordination

3.1. Definitions

A release is an authorization for the accepting ATS unit to climb, descend and/or turn (by no more than 45°) a specific aircraft before the transfer of control point. The transferring ATS unit remains responsible for separation within its Area of Responsibility unless otherwise agreed.

Wherever VATSIM callsigns are used to describe the terms of a certain procedure, this procedure is also applicable for all higher stations that take over the responsibilities of said station. E.g., procedures for an APP-stations are also applicable for the respective CTR station fulfilling the duties of said APP station.

The use of VATSIM callsigns in this document includes any variation of said callsign. E.g., any procedure applicable for LZBB_CTR may also be used by LZBB_U_CTR or any procedure applicable for EPWW_CTR may also be used by EPWW_J_CTR.

3.2. General conditions

Coordination of flights shall take place via the agreed coordination points (COP).

Coordinated flights shall be handed off via a valid COP. Any deviation shall be coordinated verbally, by text or by Euroscope inter-sector coordination.

Traffic shall be handed off at the levels defined in the regulations below. If a specified level restriction cannot be met due to a lower RFL, traffic shall be handed off at RFL, if this does not cause a conflict with any other traffic. Otherwise, traffic should be coordinated.

If a traffic situation is not covered herein or closely matching a covered one, individual coordination between the concerned sectors shall be made.

After Transfer of communications, traffic is NOT released for climb, descent or turns until Transfer of control or otherwise specified in this Letter of Agreement.

↓FLxxx / ↑FLxxx means „descending / climbing to a specified FL“, without any further restriction. Any required crossing/speed restriction shall be added separately. At level means that the aircraft shall be in level flight on a published flight level and in accordance with east/ west odd/even policy.

3.3. IFR flights from FIR Warszawa to FIR Bratislava

Concerned Airport	COP	Level Allocation	Special Conditions

3.5. VFR flights from FIR Warszawa to FIR Bratislava

For controlled VFR flights coordination, transfer of control and transfer of communication shall take place as for IFR flights. Uncontrolled VFR flights shall be transferred to the appropriate sector if in radio contact. If online, LZBB_I_CTR (Bratislava Info) 124.300, shall be the primary sector for uncontrolled VFR flights.

3.6. VFR flights from Bratislava FIR to Warszawa FIR

For controlled VFR flights coordination, transfer of control and transfer of communication shall take place as for IFR flights. Uncontrolled VFR flights shall be transferred to the appropriate sector if in radio contact. If online, EPKK_I_APP (Kraków Informacja) 119.275 or EPWW_I_CTR (Warszawa Informacja) 134.875, shall be the primary sector for uncontrolled VFR flights.

4. Special Procedures

4.1. Non-standard arrivals

Any of non-standard arrivals such as NON-RNAs etc. should be coordinated manually.

5. Transfer of Control and Transfer of Communications

5.1. Transfer of Control

Transfer of Control shall take place at the AoR boundary. If the downstream sector in EuroScope is set to >.break<, the procedure 5.4 is suspended and transfer of communication can only take place after the downstream sector has assumed the flight via the appropriate function of the radar client. If it becomes necessary to reduce or suspend transfers, a 5-minute prior notification is required. When transfers are suspended, the hand-off procedure (5.4) is suspended.

5.2. Silent transfer of control

Transfer of radar control from one elementary sector to another without the systematic use of bidirectional speech facilities may be affected provided the horizontal distance between the aircraft involved is not less than 10 NM within 5 minutes flying time after passing the transfer of control point unless vertical separation exists.

5.3. Transfer of Communications

Transfer of Communications shall take place no later than Transfer of Control.

5.4. Hand-off procedure

Unless otherwise agreed between stations online, the following hand-off procedure shall apply:

1. The upstream sector sends the aircraft to the frequency of the downstream sector by voice or text.
2. The upstream sector initiates a transfer via the appropriate function of the radar client.
3. Upon initial call the downstream sector assumes the flight via the appropriate function of the radar client.

5.5. SSR Code Assignment

ATS units shall transfer flights on verified discrete SSR codes. Any change of SSR code by the accepting ATS unit may only take place after the transfer of control point.
